PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of experience building scalable web and mobile applications. Proficient in React JS (Hooks, Context API), React Native, and JavaScript (ES6+) for responsive, component-driven frontends. Skilled in Java/JDBC backend development, RESTful API design, and MySQL/PostgreSQL database management. Experienced in LLM integration using Google Gemini API with prompt engineering for real-world AI chatbot solutions. Adept at delivering end-to-end features in Agile/Scrum environments with CI/CD workflows.

TECHNICAL SKILLS

Frontend Development: React JS (Hooks, Context API, Functional Components), React Native (Cross-Platform Mobile), JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Web Design, Component-Based Architecture, REST API Integration

Backend Development: Java (Core Java, OOP, Collections), JDBC, RESTful API Design and Integration, Node.js (Familiar), MVC Architecture, JSON, HTTP/HTTPS Protocols

Database Management: MySQL, PostgreSQL, SQL Query Optimization, Relational Database Design, Schema Management

AI/ML & Data: Google Gemini API (LLM Integration, Prompt Engineering), Python, NumPy, Pandas, Exploratory Data Analysis (EDA), Data Visualization (Matplotlib)

Tools & Methodologies: Git, GitHub, Postman, Agile/Scrum, CI/CD Pipelines, VS Code, npm, Chrome DevTools, Jira, Figma (Familiar)

WORK EXPERIENCE

Full Stack Developer | Vasaptex Pvt Ltd

February 2025 – Present

- Built and maintained high-performance React JS applications using functional components and React Hooks (useState, useEffect, useContext, useCallback), delivering fully responsive, cross-browser-compatible UI with optimized Core Web Vitals and component reusability.
- Designed and deployed scalable RESTful APIs using Java and JDBC with fine-tuned SQL queries (indexing, joins, pagination), achieving measurable reductions in API response times and boosted backend throughput for production fintech features.
- Architected and implemented a real-time LLM-based conversational chatbot by integrating Google Gemini API, applying custom prompt engineering and context management to sharpen user interaction accuracy and automate support workflows.
- Elevated frontend performance and maintainability by refactoring monolithic components into modular, reusable React component libraries, cutting code duplication by 40%+ and accelerating feature development velocity across the team.
- Collaborated cross-functionally in Agile/Scrum teams, participating in sprint planning, code reviews, and daily standups to ensure timely delivery of features from design to production deployment.
- Leveraged Postman for API contract testing and Git/GitHub for version-controlled development, upholding code quality through peer reviews and driving seamless CI/CD pipeline execution and zero-downtime deployments.

PROJECTS

AI Chatbot using Google Gemini API

Technologies: React JS, Google Gemini API (LLM), Prompt Engineering, JavaScript, REST API

- Designed and deployed a production-grade real-time AI chatbot using Google Gemini API (LLM), enabling intelligent natural language understanding, multi-turn conversations, and automated customer support workflows.
- Implemented advanced prompt engineering techniques including few-shot prompting and context window management, maximizing response accuracy and conversational relevance.
- Engineered multi-turn conversation history management to preserve contextual dialogue state across user sessions, delivering measurably sharper chatbot coherence.
- Integrated the chatbot as a reusable React JS component into the main application, implementing state management and UI feedback patterns that reduced manual support overhead and strengthened user retention.
- Slashed API call overhead through request batching and response caching strategies, cutting response latency and reducing API token consumption.

Violence Against Women and Girls – Exploratory Data Analysis

Technologies: Python, NumPy, Pandas, Matplotlib, EDA, Data Visualization, Kaggle Dataset

- Conducted end-to-end Exploratory Data Analysis (EDA) on a structured Kaggle dataset comprising 12,600 rows and 8 columns, spanning 70 countries across the 2000–2018 timeline.
- Performed data cleaning, null value treatment, outlier detection, and feature engineering using Pandas and NumPy to ensure data integrity prior to analysis.
- Developed multi-dimensional data visualizations using Matplotlib to surface key statistical patterns and trends, identifying Eritrea as the country with the highest reported violence incidents in the dataset.
- Extracted actionable insights through statistical aggregation and cross-country comparative analysis, showcasing end-to-end proficiency in Python-based data science workflows.

EDUCATION

Bachelor of Technology (B.Tech)

ABES Institute of Technology, Ghaziabad | 2020 – 2024 | Percentage: 78%

Intermediate – Class XII (Science)

Methodist High School | 2019 – 2020 | Percentage: 82%

High School – Class X

Methodist High School | 2017 – 2018 | Percentage: 83%

CERTIFICATIONS

- Core Java Internship – UpSkill Campus (2023)
- Machine Learning Training – GI Ventures (2023)
- Data Science Training – ABESIT (2023)
